SCORE is committed to student success across the kindergarten through career continuum. This report provides a snapshot of data across K-12 and postsecondary education as well as career and civic engagement as a means of highlighting opportunities for improvement. Data and data-insights specific to each school district and county are provided in the pages that follow.

With this report, we hope Tennessee’s leaders, educators, and advocates will be able to better understand key education metrics and think about the data that might be most relevant to your work to improve outcomes for Tennessee students.

**HOW TO USE THE DATA BOOK**

**Review Local Data:** Look at the data for your local school district. If there is any missing data, particularly for independent or municipal school districts, look to the data of the county-wide districts.

**Review Local Data Insights:** Review the specific data insights included for your school district and/or county.

**Ask Questions About The Data:** Consider the following questions about the data for your community’s school district, and use the data insights to help contextualize your analysis.

- **Across education milestones:** What are the success rates of students in your community across each of the education milestones? Do these rates of success improve, stay the same, or decline as students move through the education system?

- **Across student groups:** Where are there differences in success rates across student groups? Do these success rates improve, stay the same, or decline as students move through the education system?

- **Across Tennessee:** Using the provided insights, compare your district to similarly sized districts in Tennessee. Consider comparisons with communities that are in your region as well as communities that are not geographically close by to your school district.

**Consider Local Context:** As the purpose of the student outcomes data provided in this data book is to provide a snapshot of education outcomes across the kindergarten to career continuum, what other information might you want to review to get a fuller picture of your local school district’s strengths and opportunities for improvement?

Key Takeaways

1. Hispanic students are the fastest-growing student group in Tennessee, with a 15 percent increase over the last three years.
   Overall enrollment in Tennessee schools has declined slightly over the past three years.

2. White students are more than twice as likely to pass the third grade reading assessment as black students.
   The largest gap in third grade reading proficiency rate (24.2 percentage points) is between economically disadvantaged students and non-economically disadvantaged students.

3. There are significant gaps in postsecondary completion rates, with economically disadvantaged students being 2.5 times less likely to complete postsecondary within six years than non-economically disadvantaged students.
   However, all student groups (white, black, Hispanic, economically disadvantaged, and English learners) have increased their postsecondary completion rate over the last three years.

4. Tennessee exceeds the national average for percentage of 'opportunity youth', which means teenagers and young adults between the ages of 16 and 24 who are neither working nor in school.
   Tennessee's median household income has risen more than 18 percent over the last five years, which aligns with a similar change nationwide.

- Economically disadvantaged: 75.3%
- English learners: 3.1%

Key Takeaways

1. Achievement School District had the third largest enrollment in the Southwest Tennessee region, and is larger than the typical district statewide.

   Achievement School District had the largest proportion of black students in the state.

2. Achievement School District reduced the third grade reading proficiency rate gap between economically disadvantaged and non-economically disadvantaged students.

   Achievement School District had larger than average growth in its seventh grade math proficiency rate for Hispanic students.

3. Achievement School District had the fifth largest growth in its postsecondary enrollment rate for English learners in the state.

   Achievement School District had the fourth highest postsecondary enrollment rate for English learners in the state.

4. Shelby County had about the same number of opportunity youth as the typical county in the Southwest Tennessee region. Opportunity youth are defined as teenagers and young adults between the ages of 16 and 24 who are neither working nor in school.

   Shelby County had lower voter turnout than the average county in the state.
By The Numbers: SCORE 2020 Index Of Education Data • Achievement School District

K-12 Measures

Third Grade Reading Proficiency Rate

Achievement School District reduced the third grade reading proficiency rate gap between economically disadvantaged and non-economically disadvantaged students. Achievement School District had the lowest third grade reading proficiency rate for black students in the state.

Seventh Grade Math Proficiency Rate

Achievement School District had larger than average growth in its seventh grade math proficiency rate for Hispanic students. Achievement School District had the third lowest seventh grade math proficiency rate for white students in the state.

Students Scoring 21 Or Better On The ACT

Achievement School District had the smallest ACT performance gap for black, Hispanic, and Native American students relative to the overall rate. Achievement School District had the second lowest percentage of economically disadvantaged scoring 21 or better on the ACT.
Postsecondary Measures

Postsecondary Enrollment Rate

Achievement School District had the fifth largest growth in its postsecondary enrollment rate for English learners in the state. Achievement School District had the fourth highest postsecondary enrollment rate for English learners in the state.

Postsecondary Completion Rate

There are no data available for this metric.

**Key Takeaways**

1. **Carter County Schools** had a similar enrollment as the typical district in the First Tennessee region, and is larger than the typical district statewide.
   - Carter County Schools had a student population with fewer than average black students, fewer than average Hispanic students, fewer than average English learners, and greater than average economically disadvantaged students.

2. **Carter County Schools** had larger than average growth (top 20 percent) in its third grade reading proficiency rate for economically disadvantaged students.
   - Carter County Schools increased the seventh grade math proficiency rate gap between economically disadvantaged and non-economically disadvantaged students.

3. **Carter County Schools** saw an increase in the postsecondary completion rate gap between economically disadvantaged and non-economically disadvantaged students.
   - Carter County Schools saw slightly less than average growth in its overall postsecondary completion rate.

4. **Carter County** had the second fewest opportunity youth in the First Tennessee region. Opportunity youth are defined as teenagers and young adults between the ages of 16 and 24 who are neither working nor in school.
   - Carter County had higher voter turnout than the average county in the state.
K-12 Measures

Third Grade Reading Proficiency Rate

Carter County Schools had larger than average growth (top 20 percent) in its third grade reading proficiency rate for economically disadvantaged students. Carter County Schools had larger than average growth (top 20 percent) in its overall third grade reading proficiency rate.

Seventh Grade Math Proficiency Rate

Carter County Schools increased the seventh grade math proficiency rate gap between economically disadvantaged and non-economically disadvantaged students. Carter County Schools had larger than average growth in its overall seventh grade math proficiency rate.

Students Scoring 21 Or Better On The ACT

Carter County Schools increased its ACT performance gap for economically disadvantaged students relative to the overall rate. Carter County Schools had a decline in its overall percentage of students scoring 21 or better on the ACT.
Postsecondary Measures

Postsecondary Enrollment Rate

Carter County Schools had larger than average growth in its postsecondary enrollment rate for economically disadvantaged students. Carter County Schools had a decline in its overall postsecondary enrollment rate.

Postsecondary Completion Rate

Carter County Schools saw an increase in the postsecondary completion rate gap between economically disadvantaged and non-economically disadvantaged students. Carter County Schools saw slightly less than average growth in its overall postsecondary completion rate.

Key Takeaways

1. **Coffee County Schools had the sixth largest enrollment in the South Central Tennessee region, and is larger than the typical district statewide.**
   Coffee County Schools had a student population with fewer than average black students, greater than average Hispanic students, greater than average English learners, and fewer than average economically disadvantaged students.

2. **Coffee County Schools reduced the third grade reading proficiency rate gap between economically disadvantaged and non-economically disadvantaged students.**
   Coffee County Schools had the second largest decrease in its seventh grade math proficiency rate for Hispanic students in the state.

3. **Coffee County Schools saw above average growth (top 20 percent) in its postsecondary completion rate for black students.**
   Coffee County Schools saw the third highest postsecondary completion rate for black students in the state.

4. **Coffee County had more opportunity youth than the average county in the state.** Opportunity youth are defined as teenagers and young adults between the ages of 16 and 24 who are neither working nor in school.
   Coffee County had higher voter turnout than the typical county in the South Central Tennessee region.
K-12 Measures

Third Grade Reading Proficiency Rate

Coffee County Schools reduced the third grade reading proficiency rate gap between economically disadvantaged and non-economically disadvantaged students. Coffee County Schools showed slightly less than average growth in its overall third grade reading proficiency rate.

Seventh Grade Math Proficiency Rate

Coffee County Schools had the second largest decrease in its seventh grade math proficiency rate for Hispanic students in the state. Coffee County Schools had the second lowest seventh grade math proficiency rate for Hispanic students in the state.

Students Scoring 21 Or Better On The ACT

Coffee County Schools had negligible change in its ACT performance gap for economically disadvantaged students relative to the overall rate. Coffee County Schools had a decline in its overall percentage of students scoring 21 or better on the ACT.
Postsecondary Measures

Postsecondary Enrollment Rate

Coffee County Schools had negligible change in the postsecondary enrollment rate gap between economically disadvantaged students and the overall postsecondary enrollment rate. Coffee County Schools had the fourth lowest postsecondary enrollment rate for economically disadvantaged students in the state.

Postsecondary Completion Rate

Coffee County Schools saw above average growth (top 20 percent) in its postsecondary completion rate for black students. Coffee County Schools saw the third highest postsecondary completion rate for black students in the state.
Economic And Civic Measures

These measures are only available at the county-level and are presented based on the county in which the school district resides.

Opportunity Youth

Opportunity youth are defined as teenagers and young adults between the ages of 16 and 24 who are neither working nor in school.

Coffee County had more opportunity youth than the average county in the state. It had about the same number of opportunity youth as the typical county in the South Central Tennessee region.

Income

Median Household Income from the 2017 American Community Survey

Coffee County had lower household income than the average county in the state. It had about the same household income as the typical county in the South Central Tennessee region.

Voting

Voter turnout in the November 2018 gubernatorial election

Coffee County had higher voter turnout than the typical county in the South Central Tennessee region. It had similar voter turnout to the average county in the state.

Oneida Special School District

Number of K-12 Schools: 3
Grades Served: PK-12
County: Scott County
Distressed County: Yes

Total 2017-18 K-12 Student Enrollment: 1,224

Student Groups
- Black: 0.8%
- Hispanic: 0.7%
- White: 97.5%
- Economically disadvantaged: 30.1%
- English learners: 0%

Key Takeaways

1. Oneida Special School District had a smaller enrollment than the typical district in the East Tennessee region, and is smaller than the typical district statewide.
   - Oneida Special School District had the third smallest proportion of Hispanic students in the state.

2. Oneida Special School District had larger than average growth (top 20 percent) in its third grade reading proficiency rate for economically disadvantaged students.
   - Oneida Special School District reduced the seventh grade math proficiency rate gap between economically disadvantaged and non-economically disadvantaged students.

3. Oneida Special School District saw larger than average growth (top 20 percent) in its postsecondary completion rate for economically disadvantaged students.
   - Oneida Special School District saw a postsecondary completion rate for economically disadvantaged students in the top 20 percent of the state.

4. Scott County had the third lowest voter turnout in the state.
   - It had lower voter turnout than the typical county in the East Tennessee region.
K-12 Measures

Third Grade Reading Proficiency Rate

Oneida Special School District had larger than average growth (top 20 percent) in its third grade reading proficiency rate for economically disadvantaged students. Oneida Special School District had a third grade reading proficiency rate for economically disadvantaged students in the top 20 percent of the state.

Seventh Grade Math Proficiency Rate

Oneida Special School District reduced the seventh grade math proficiency rate gap between economically disadvantaged and non-economically disadvantaged students. Oneida Special School District had a decline in its overall seventh grade math proficiency rate.

Students Scoring 21 Or Better On The ACT

Oneida Special School District increased its ACT performance gap for economically disadvantaged students relative to the overall rate. Oneida Special School District had a decline in its overall percentage of students scoring 21 or better on the ACT.

### Key Takeaways

1. **Scott County Schools** had a smaller enrollment than the typical district in the East Tennessee region, and is about the same size as the typical district statewide.
   - Scott County Schools had a student body that was mostly economically disadvantaged.

2. **Scott County Schools** reduced the third grade reading proficiency rate gap between economically disadvantaged and non-economically disadvantaged students.
   - Scott County Schools increased the seventh grade math proficiency rate gap between economically disadvantaged and non-economically disadvantaged students.

3. **Scott County Schools** saw larger than average growth (top 20 percent) in its postsecondary completion rate for economically disadvantaged students.
   - Scott County Schools saw the fifth highest postsecondary completion rate for economically disadvantaged students in the state.

4. **Scott County had the third lowest voter turnout in the state.**
   - It had lower voter turnout than the typical county in the East Tennessee region.
K-12 Measures

Third Grade Reading Proficiency Rate

Scott County Schools reduced the third grade reading proficiency rate gap between economically disadvantaged and non-economically disadvantaged students. Scott County Schools had a decline in its overall third grade reading proficiency rate.

Seventh Grade Math Proficiency Rate

Scott County Schools increased the seventh grade math proficiency rate gap between economically disadvantaged and non-economically disadvantaged students. Scott County Schools showed slightly less than average growth in its overall seventh grade math proficiency rate.

Students Scoring 21 Or Better On The ACT

Scott County Schools had larger than average growth (top 20 percent) in its percentage of economically disadvantaged students scoring 21 or better on the ACT. Scott County Schools had larger than average growth (top 20 percent) in its overall percentage of students scoring 21 or better on the ACT.
Postsecondary Measures

Postsecondary Enrollment Rate

Scott County Schools had larger than average growth in its postsecondary enrollment rate for economically disadvantaged students. Scott County Schools had larger than average growth (top 20 percent) in its overall postsecondary enrollment rate.

Postsecondary Completion Rate

Scott County Schools saw larger than average growth (top 20 percent) in its postsecondary completion rate for economically disadvantaged students. Scott County Schools saw the fifth highest postsecondary completion rate for economically disadvantaged students in the state.

Key Takeaways

1. **Tullahoma City Schools had a smaller enrollment than the typical district in the South Central Tennessee region, and is about the same size as the typical district statewide.**
   Tullahoma City Schools had a student population with greater than average black students, greater than average Hispanic students, about the same number of English learners, and fewer than average economically disadvantaged students.

2. **Tullahoma City Schools had larger than average growth in its third grade reading proficiency rate for Hispanic students.**
   Tullahoma City Schools had above average growth (top 20 percent) in its seventh grade math proficiency rate for black students.

3. **Tullahoma City Schools saw above average growth (top 20 percent) in its postsecondary completion rate for black students.**
   Tullahoma City Schools saw a postsecondary completion rate for black students in the top 20 percent of the state.

4. **Coffee County had more opportunity youth than the average county in the state. Opportunity youth are defined as teenagers and young adults between the ages of 16 and 24 who are neither working nor in school.**
   Coffee County had higher voter turnout than the typical county in the South Central Tennessee region.
K-12 Measures

Third Grade Reading Proficiency Rate

- Tullahoma City Schools had larger than average growth in its third grade reading proficiency rate for Hispanic students. Tullahoma City Schools had a decline in its overall third grade reading proficiency rate.

Seventh Grade Math Proficiency Rate

- Tullahoma City Schools had above average growth (top 20 percent) in its seventh grade math proficiency rate for black students. Tullahoma City Schools had larger than average growth (top 20 percent) in its overall seventh grade math proficiency rate.

Students Scoring 21 Or Better On The ACT

- Tullahoma City Schools reduced the ACT performance gap for black, Hispanic, and Native American students relative to the overall rate. Tullahoma City Schools had a decline in its overall percentage of students scoring 21 or better on the ACT.
Postsecondary Measures

Postsecondary Enrollment Rate

Tullahoma City Schools had larger than average growth in its postsecondary enrollment rate for economically disadvantaged students. Tullahoma City Schools had larger than average growth (top 20 percent) in its overall postsecondary enrollment rate.

Postsecondary Completion Rate

Tullahoma City Schools saw above average growth (top 20 percent) in its postsecondary completion rate for black students. Tullahoma City Schools saw a postsecondary completion rate for black students in the top 20 percent of the state.
Economic And Civic Measures

These measures are only available at the county-level and are presented based on the county in which the school district resides.

Opportunity Youth

Opportunity youth are defined as teenagers and young adults between the ages of 16 and 24 who are neither working nor in school.

- **County:** 16.1%
- **State:** 12.6%

Coffee County had more opportunity youth than the average county in the state. It had about the same number of opportunity youth as the typical county in the South Central Tennessee region.

Income

Median Household Income from the 2017 American Community Survey

- **County:** $46,614
- **State:** $48,708

Coffee County had lower household income than the average county in the state. It had about the same household income as the typical county in the South Central Tennessee region.

Voting

Voter turnout in the November 2018 gubernatorial election

- **County:** 54%
- **State:** 54%

Coffee County had higher voter turnout than the typical county in the South Central Tennessee region. It had similar voter turnout to the average county in the state.

Key Takeaways

1. Wayne County Schools had a smaller enrollment than the typical district in the South Central Tennessee region, and is smaller than the typical district statewide. Wayne County Schools had a student population with fewer than average black students, fewer than average Hispanic students, fewer than average English learners, and fewer than average economically disadvantaged students.

2. Wayne County Schools increased the third grade reading proficiency rate gap between economically disadvantaged and non-economically disadvantaged students. Wayne County Schools reduced the seventh grade math proficiency rate gap between economically disadvantaged and non-economically disadvantaged students.

3. Wayne County Schools saw the fourth largest increase in the postsecondary completion rate gap between economically disadvantaged and non-economically disadvantaged students. Wayne County Schools saw slightly less than average growth in its overall postsecondary completion rate.

4. Wayne County had many more than average (top 20 percent) opportunity youth in the state. Opportunity youth are defined as teenagers and young adults between the ages of 16 and 24 who are neither working nor in school. Wayne County had lower voter turnout than the average county in the state.
K-12 Measures

Third Grade Reading Proficiency Rate

Wayne County Schools increased the third grade reading proficiency rate gap between economically disadvantaged and non-economically disadvantaged students. Wayne County Schools had a decline in its overall third grade reading proficiency rate.

Seventh Grade Math Proficiency Rate

Wayne County Schools reduced the seventh grade math proficiency rate gap between economically disadvantaged and non-economically disadvantaged students. Wayne County Schools had the fifth lowest seventh grade math proficiency rate for white students in the state.

Students Scoring 21 Or Better On The ACT

Wayne County Schools had one of the smallest ACT performance gaps for economically disadvantaged students relative to the overall rate. Wayne County Schools had a decline in its overall percentage of students scoring 21 or better on the ACT.
Postsecondary Measures

Postsecondary Enrollment Rate

Wayne County Schools increased the postsecondary enrollment rate gap between economically disadvantaged students and the overall postsecondary enrollment rate. Wayne County Schools had a postsecondary enrollment rate for economically disadvantaged students in the top 20 percent of the state.

Postsecondary Completion Rate

Wayne County Schools saw the fourth largest increase in the postsecondary completion rate gap between economically disadvantaged and non-economically disadvantaged students. Wayne County Schools saw slightly less than average growth in its overall postsecondary completion rate.
Economic And Civic Measures

These measures are only available at the county-level and are presented based on the county in which the school district resides.

Opportunity Youth

Opportunity youth are defined as teenagers and young adults between the ages of 16 and 24 who are neither working nor in school.

- **Wayne County** had many more than average (top 20 percent) opportunity youth in the state. It had more opportunity youth than the typical county in the South Central Tennessee region.

Income

**Median Household Income from the 2017 American Community Survey**

- **Wayne County** is in the bottom 20 percent of the state in household income. It had lower household income than the typical county in the South Central Tennessee region.

Voting

**Voter turnout in the November 2018 gubernatorial election**

- **Wayne County** had lower voter turnout than the average county in the state. It had lower voter turnout than the typical county in the South Central Tennessee region.
